CONTENTS VOL. 114, 1990

Research Papers
The snowmelt of Mt. Hermon and its contribution to the sources of the Jordan River
D. Gil'ad and J. Bonne (Jerusalem, Israel) 1
On improved hydrologic forecasting — results from a WMO real-time forecasting experiment
K.P. Georgakakos (Iowa City, IA, U.S.A.) and G.F. Smith (Silver Spring, MD, U.S.A.) 17
Estimation of runoff-routing model parameters using incompatible storm data
G. Kuczera (Newcastle, N.S.W., Australia) 47
Exemple d'étude géochimique et isotopique de circulations aquifères en terrain volcanique sous climat semi-aride (Amurga, Gran Canaria, Iles Canaries)
A. Gasparini, J.-C. Fontes (Orsay, France), E. Custodio (Barcelona, Spain), J. Jimenez and J.A. Nuñez (Gran Canaria, Canary Islands, Spain) 61
Vadose-zone recharge and weathering in an Eocene sand deposit, East Texas, U.S.A.
A.R. Dutton (Austin, TX, U.S.A.). 93
The interpretation of pump-test data from a disused underground mine
J. Doherty (Townsville, Qld., Australia) 109
A point rainfall model based on a three-state continuous Markov occurrence process
M.F. Hutchinson (Canberra, A.C.T., Australia) 125
Modeling the effects of unsaturated, stratified sediments on groundwater recharge from intermittent streams
M.E. Reid and S.J. Dreiss (Santa Cruz, CA, U.S.A.) 149
Analysis of an aquifer-water table aquitard system
K. Sridharan, M. Sekhar and M.S. Mohan Kumar (Bangalore, India). 175
Sediment delivery ratio prediction equations for short catchment slopes in a humid tropical environment
F.S. Ebisemiju (Ado-Ekiti, Ondo State, Nigeria). 191

Errata 209

Research Papers 211
Simulation of dispersion in layered coastal aquifer systems
T.E. Reilly (Reston, VA, U.S.A.) 211
A radar rainfall forecasting method designed for hydrological purposes
T. Einfalt, T. Denoeux (Noisy-le-Grand, France) and G. Jacquet (Versailles, France) . 229
Evaluation of hydrogeochemical parameters with spontaneous potential logs
I. Radhakrishna and T. Gangadhara Rao (Hyderabad, India). 245
Rainfall interception in the Tai Forest, Ivory Coast: application of two simulation models to a humid tropical system
R.W.A. Hutjes, A. Wierda and A.W.L. Veen (Haren, The Netherlands) 259
On some fundamental weak spots of kriging technique and their consequences
J.W. de Kwaadsteniet (Bilthoven, The Netherlands). 277
Estimating groundwater recharge using a surface watershed modelling approach
F.H.S. Chiew and T.A. McMahon (Melbourne, Vic., Australia). 285
Estimating groundwater recharge using a surface watershed model: sensitivity analyses
F.H.S. Chiew and T.A. McMahon (Melbourne, Vic., Australia). 305
Simulation of land use changes and impacts on the water balance — a case study for Belgium
F. Bultot, G.L. Dupriez and D. Gellens (Brussels, Belgium) 327
The spatially continuous determination of groundwater flow to surface water bodies: application to the Connecting Channels between Lakes Huron and Erie
D.S Cherkauer and R.W. Taylor (Milwaukee, WI, U.S.A.). 349

Hydrochemical characterization of groundwater mixing in sedimentary and metamorphic reservoirs with combined use of Piper's principle and factor analysis
M. Razack (Montpellier, France) and J. Dazy (Grenoble, France) 371
Evaluation of three evapotranspiration models in terms of their applicability for an arid region
R. Lemeur (Ghent, Belgium) and Lu Zhang (Brussels, Belgium) 395
Using isotope fractionation of nitrate–nitrogen and nitrate–oxygen for evaluation of microbial denitrification in a sandy aquifer
J. Böttcher, O. Strebel (Hannover, F.R.G.), S. Voerkelius and H.-L. Schmidt (Freising - Weihenstephan, F.R.G.) 413
Erratum 425
Contents Volume 114, 1990 427
